

FEMP Presents the Data Center Energy Efficiency Best Practices Workshop (.4 CEUs)

FREE Pre-Energy Exchange Workshop; August 14, 2017

1:00-5:00 PM, ET

Tampa, Florida

The Federal Energy Management Program (FEMP) would like to invite you to participate in a workshop focused on energy efficiency in data centers. Topics will include:

- Why energy-efficient data centers are critical
- State-of-the-art data center energy efficiency technologies and management techniques
- Identifying sources of energy use in data centers/benchmarking opportunities
- Better Buildings and FEMP program technical assistance resources
- Best practices for:
 - Acquisition strategy
 - Benchmarking
 - Performance metrics
 - Managing energy and environmental systems
 - Monitoring, analytics, and reporting
 - Data center energy efficiency
 - Federal requirements
 - Resource integration
 - Much more

For more information on DOE's Data Center Efficiency resources, visit the Center of Expertise website:
